Face Fixed Aluminium Frame
Garage Door with grey
aluminium composite panels.

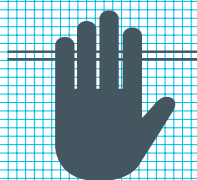

Strong and durable, Steel-Line garage doors are made in Australia for the harsh Australian conditions.

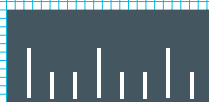

Steel-Line supports Australian jobs which is why our garage doors are predominately made with the highest quality Australian BlueScope® steel.

A trusted Australian brand, Steel-Line have been making garage doors for Australians by Australians for over 40 years.

Award-winning FingerProof™ Safety design is a **standard feature** for Steel-Line sectional doors.

Every garage door is custom made and manufactured to your requirements. It's one of the reasons the majority of Australia's major builders choose Steel-Line garage doors.

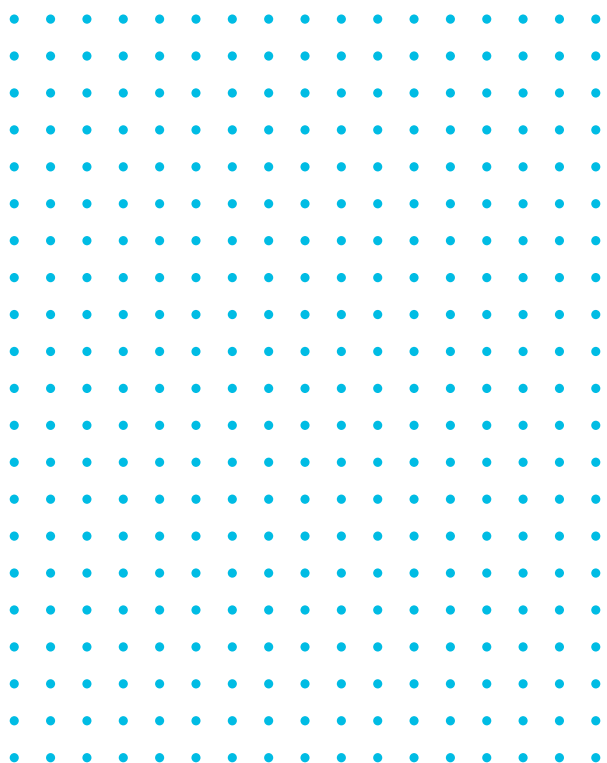

Steel-Line offer a full range of accessories to suit your personal needs. View our range from page 57.

Face Fixed Aluminium Frame Selection

The face fixed design is laying the aluminium composite panels over the frame for that architectural look. The aluminium composite panels are the premier choice for an exterior cladding that will maximize the beauty of the structure while providing a sustainable product to prolong the life of the building.

Despite being conveniently lightweight, these aluminium composite panels certainly aren't pushovers. They have impressive durability and strength, making them well suited to bearing the tough conditions of the Australian climate. Our face fixed design is lightweight, weather-resistant, has a maximum wind rating of C3 for wind regions C and D in Australia.

Custom Collection Sectional Door in Barn Style Western Red Cedar.

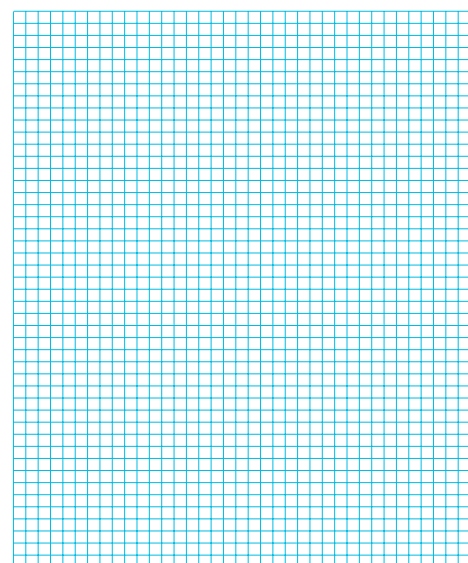

Flush Mount Selection

Steel-Line's flush mount garage door blends in your facade with the cladding of your choice to create a seamless appearance to the front of your home. Flush finish means the surface of the garage door and the external wall surrounding it are on the same plane.

The flush mount garage doors are suitable to take a total weight of up to 175kg for tilt doors, and 250kg for sectional doors. They can be clad with the building's exterior materials, including timbers, composite timbers, metal, aluminium composite panel and acrylic. The integrated cladding materials make the door appear to be part of the building's wall system. Our flush mount doors are perfect for an architecturally designed building giving the exterior cladding a continuous look and essentially making the door invisible.

NOTE: All flush mount garage doors are made to order. Select a cladding material from our range or order as frame only and get your builder to clad on site to match the rest of your façade for that invisible look.

Tilt Doors

Not enough room in your garage for a sectional or roller door? A lot of older garages can be quite limited in space.

Steel-Line tilt garage doors offer the perfect solution for smaller garages or spaces with restricted side or head room. Manufactured to fit most garage openings and easily installed, the tilt garage door offers safety, security and convenience in a wide range of colours and materials.

The choices of material is almost as varied as your imagination allows and commonly includes plywood and moulding, K-panel, Colorbond®, Western Red Cedar, aluminium composite panels, copper sheeting, clear or textured glass/ acrylic, and many other types of cladding.

NOTE: Not all options available in all markets. Please refer to your Product Consultant for our wide variety of design options in your area.

Louvre Garage Door in Colorbond® Surfmist® colour.

Louvre Doors

Steel-Line's aluminium Louvre sectional garage door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre garage doors. Designed and manufactured in Australia, our Louvre garage door is extremely strong and secure with a modern architectural look. It's ability to provide privacy for what is inside and still allow a minimum 22% ventilation, makes this the door of choice for many modern developments.

Steel-Line Louvre garage doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012 (also available for C2 & C3).

The Timber Look Series

Your garage door is often the largest and most prominent frontal feature of your home. For this reason, choosing the right garage door is a crucial decision that can significantly influence the value and aesthetics of your most prized asset.

If you like the natural look and warmth that wood conveys, we can offer you Natural Timber, DecoWood®, Colorbond®, UniCote® LUX Timbers of the World and our Biowood® series.

Each offering has different benefits depending on your requirements, while providing the warm and homey charm that a timber look provides.

Our impressive assortment of beautifully crafted options offers a classic and timeless style that evokes a feeling of tradition with a modern twist.

The above is one of our Natural Timber Garage Doors with V joint profile.

You dream it, we create it.

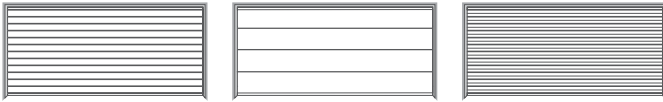

Timber Selection

The DecoWood® garage door is ideal for coastal properties and bushfire prone areas with its marine grade powder coating. It is made from BlueScope® steel, which is an incredibly versatile material, preferred by builders and designers alike for its strength, durability, flexibility, lightness and corrosion-resistance.

Unlike timber, DecoWood® garage doors don't warp, shrink, splinter or rot. They require little maintenance, and they are also completely impervious to termites.

Natural Timber Selection

Stand out from the crowd with a door as unique as you.

As our timber garage doors are custom designed and manufactured, you can rest assured we will create a product to meet your dimensions and requirements. No matter what shape or size your garage is, a timber door can be made to suit it - and it will look fantastic.

And because this range is custom-built using natural products, you can look forward to having a truly one-of-a-kind garage door that has its own unique look and character.

The most popular timber used in this range is Western Red Cedar, a lightweight yet solid timber that looks equally beautiful on a renovated or new home being built.

Timber Selection

Steel-Line's BioWood® garage door retains the natural look and feel, is low maintenance and meets the standard for fire safety under BAL-29 conditions.

There are several good reasons to choose a BioWood® garage door for your home. BioWood® wood composite products are created using 0.85 density natural cellulose fibre from plantation harvested timber combined with a specially formulated resin. It retains the aesthetic natural look and feel of wood, is lightweight, provides a high degree of water resistance, does not bleach, split, crack, and is suitable for both marine applications, and bushfire-prone areas up to BAL-29 conditions; as specified in AS3959:2018. The product is termite resistant, low maintenance and is green certified by Global Green Tag. It is the perfect durable product for all building applications.

Wind rated Slimline Sectional Garage Door in Colorbond® Jasper®.

Strut-Lock™ Wind Rated Sectional Garage Doors

The Strut-Lock door is post free, incorporating the use of heavy duty struts, robust commercial hinges, top brackets in combination with a unique stile reinforcement to provide maximum resistance to forces exerted by cyclonic and high winds up to 5.5m (also available for C2 & up to N4).

Wind Rated Wind Brace Sectional Garage Doors

The Wind Brace design feature with removable steel wind brace post(s) is installed to the sectional garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature can significantly enhance wind resistance up to C4 wind rating while still ensuring a smooth door operation (also available up to 6m for C2, C3, C4 & up to N6).

Wind Rated Roller Doors

The wind rated roller doors are designed to provide additional wind resistance in extreme weather conditions. The new Wind Rated roller doors have been designed to reduce noise and increase service life. Optimised to suit your requirements, the Wind Rated roller doors are suitable for homes, sheds, commercial and industrial warehouses in cyclonic and non-cyclonic areas (C2/ N4 up to 5.5m).

Commercial and Industrial Doors

Steel-Line offer a range of commercial and industrial closures in partnership with Arco Architectural Systems that combine strength, security and reliability. We offer high quality products, exceptional customer service and real value for money within the commercial and industrial space.

Our products are typically customised to suit project specific criteria. In particular, roller shutters and roller grilles are usually individually designed to suit architectural, ventilation and aesthetic requirements.

Steel-line and Arco Architectural Systems assist in all stages of the construction process - from design specifications through to estimating, project management, supervision of the installation and efficient after sales service.

STEP ONE: SELECT A DOOR

Using the icon guide at the bottom of each page, select your door type.

SECTIONAL GARAGE DOORS

Make a bold impression with the attractive range of Steel-Line sectional garage doors. Enhance the exterior of your home with a garage door that will complement any style of architecture with a range of door styles and colours to suit the unique characteristics of your home.

ROLLER DOORS

Easy to use and long lasting, our roller doors can be made to suit almost any size opening. Combine this with a range of Colorbond® colours and smooth operation, they become true design features of your home.

ALUMINIUM FRAME DOORS

Steel-Line's innovative Custom Collection range of garage doors offers over a hundred different garage doors for you to choose from. You simply look at the façade of your home and decide what style would best suit from our wide range of options.

TILT GARAGE DOORS

Is there a particular style or feature that you have not seen in the huge range of Steel-Line garage doors? You may have a specific design feature, profile, colour, style or material in mind, or some physical requirements which a standard garage door cannot satisfy. A tilt or custom timber door could be your answer.

STEP TWO: CREATE YOUR DESIGN

Depending on the door type, now select a profile and/or series.

NOTE: The number of panels is determined by the height of the opening <2440mm (H) = 4 panels; >2450mm (H) = 5 panels.
The maximum width of the "1 section" door is 2400mm, if the inserts are aluminium composite panels, acrylic, Western Red Cedar or aluminium treadplate. The maximum width of the "2 sections" aluminium composite door is 4800mm.
Outside of these configurations, check with your Product Consultant on price and availability.

We're better together. We are **makers for life.**

At Steel-Line, we're not just makers and inventors of garage doors, we believe we are makers to the core.

We constantly strive to make things that don't just last a life-time but improve life. We are makers for life.

A photograph of a young boy and a young girl sitting in the back of a car. The boy is wearing yellow sunglasses and the girl is wearing red heart-shaped sunglasses. They are both smiling and looking towards the camera. The car's interior is visible, showing a large stuffed animal on the left and a teddy bear on the right. The text "some things you can't control..." is overlaid on the left side of the image.

**some
things
you can't
control...**

A photograph of a hand pressing a car door handle. The image is overlaid with a blue grid pattern. The text "others you can." is overlaid on the left side of the image.

**others
you can.**

HOME ENHANCERS

Coastal Upgrade Pack

 **Sectional Door Upgrade Pack** includes Brush Seals, Powdercoated tracks and brackets and stainless steel cables.

 **Roller Door Upgrade Pack** includes Brush Seals, AA Aluminium tracks with the no lock option.

The Coastal Upgrade Packs for both Sectional Doors and Roller Doors are recommended for all doors that are located within 5 kilometres from the sea to offer enhanced protection against the elements.

Photo Electric Beams

The Photo Electric Beam is designed to detect an obstruction while the door is closing and to send a signal to the opener to reverse or stop the door movement. It helps to protect your family from injury and your car from the damage caused by contact.

Wireless Security Keypad

The security keypad can be programmed with multiple, unique user codes. It is perfect for the family, trades people, or even just going for a walk. This means you can leave your keys at home with the peace of mind that your home is secure.

Additional Handsets

Key ring remote transmitters are small and convenient with the ability to operate up to four doors or gates from the one unit. A must have for every set of keys in the house.

Brush Seal

A tough and durable brush seal can help better protect your garage from the elements and satisfies the "Construction of buildings in bushfire-prone areas" standard AS3959:2018 for protecting against fire embers entering the garage.

powermesh®

simply safer

Control your garage door anytime, anywhere with the Powermesh home automation system. For more information see page 8-9.

Powermesh products work with the Zimi home ecosystem. Make your life easier and get connected today.
www.zimi.life

Battery Backup

The Marantec Comfort 380 is available with a battery backup that provides an energy supply in the event of a power cut.

Emergency Key Release

Used in case of malfunction or power failure, especially useful if there is no other access to the garage.

Wireless Wall Mounted Remote

Can be installed near an internal access door to your garage giving you greater convenience to open and close your garage door.

Garage Door Insulation

Steel-Line garage door insulation minimises the effects of the harsh Australian climate, by reducing heat loss and heat gain transferring through the door panel.

Only available with Colorbond Sectional/Smooth and Powdercoat doors.

Cut energy costs

Automatic garage locking system providing enhanced security for you, your family and your home.

SECURA-LOCK

Garages can often be the entry point for intruders as they not only contain high value and portable items such as cars and bikes, but also can often provide internal and discrete access to your home. The Secura-Lock offers you security and peace of mind.

How it works?

The Secura-Lock has been designed using advanced technology and will automatically engage when you close your door using your remote control.

The locking pin extends when the door reaches the closed position, providing you additional security and protection.

When opening, the locking pin will automatically retract, disengaging the Secura-Lock and allowing the door to raise to position.

Features

Engineered with the latest electronic technology to offer optimum protection

High quality, slim, attractive aesthetic enhances its sophisticated design

Effortless installation and integration with Marantec sectional door openers and Steel-Line SD range

Simple disengagement in the event of power failure

Set and forget. No regular charging or battery changing requirement

NOTE: Compatible with double or single sectional garage doors.

STEP FIVE: SELECT A SERVICE CARE PLAN

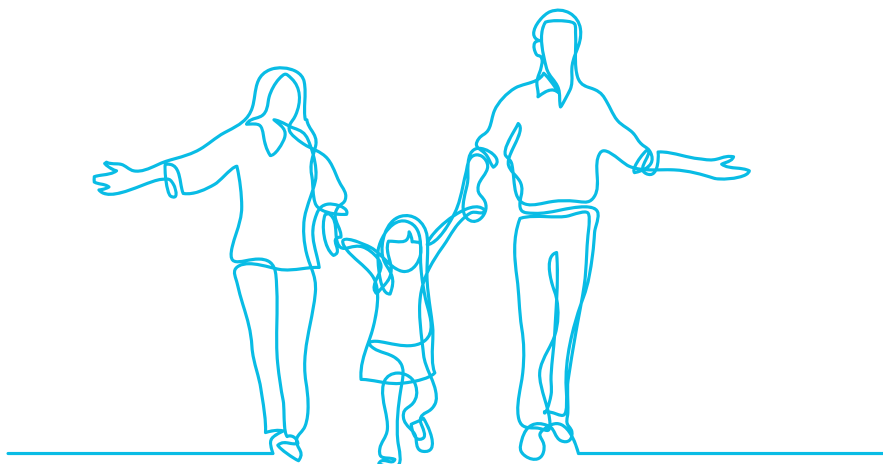

simply safer

Service Care Plan

With a Steel-Line Garage Door Service Plan you can enjoy peace of mind for less with our 3 and 5 year service plans at a much lower cost.
